FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

In the Matter of)
)
Petition for Waiver of the Commission's) FO Docket No. 91-301
Emergency Alert Requirements for) FO Docket No. 91-171
Cable Television Systems)

To: Joseph Casey
Chief, Technical & Public Safety Division
Enforcement Bureau

PETITION FOR WAIVER

Nucentrix Broadband Networks, Inc. ("Nucentrix") respectfully requests a waiver of section 11.11(a) of the Commission's rules.¹ Specifically, Nucentrix seeks a waiver of, or in the alternative, a temporary 36-month extension of time to comply with, the Emergency Alert System ("EAS") requirement for wireless cable system operators with fewer than 5,000 subscribers. Section 11.11(a) requires wireless cable systems serving fewer than 5,000 subscribers from a single transmission site to either provide national level EAS messages on all programmed channels or install EAS equipment and provide a video interrupt and audio alert on all programmed channels and EAS audio and video EAS messages on at least one programmed channel by October 1, 2002. In 1997, the Commission provided financial relief for small cable systems and stated that it would grant a waiver of the EAS rules to small cable systems on a case-by-case basis upon a showing of financial hardship.² As set forth below, Nucentrix seeks a

¹ 47 C.F.R. § 11.11(a).

² Amendment of Part 73, Subpart G, of the Commission's Rules Regarding the Emergency Broadcast System, *Second Report and Order*, FO Docket Nos. 91-171/91-301, 12 FCC Rcd 15503, 15513 (1997).

waiver of the EAS requirement for each of its wireless cable systems³ because it is in the process of converting its wireless cable systems to systems that will carry only broadband Internet and other advanced wireless communications services not subject to the EAS requirements. Due to this ongoing conversion and the financial condition of Nucentrix, installation of compliant EAS equipment is not financially viable for Nucentrix.

I. Nucentrix Video Services and the Conversion to Broadband Wireless Services.

Nucentrix provides broadband wireless Internet and multichannel video services in medium and small markets across Texas, Oklahoma and the Midwest. Nucentrix currently operates MDS/MMDS/ITFS wireless cable systems in fifty-five video markets. However, as part of its long-term plan to convert the use of its spectrum to broadband Internet and other advanced wireless services, Nucentrix recently took steps to switch substantially all of its wireless cable subscribers to programming provided by other video programming providers, which effectively will terminate its wireless cable video operations. Under agreements with DIRECTV, Inc. ("DIRECTV") and Pegasus Satellite Television, Inc. ("Pegasus"), Nucentrix will transfer the majority of its multichannel video subscribers to direct broadcast satellite ("DBS") programming provided by DIRECTV and Pegasus. Nucentrix has also entered into an agreement with an affiliate of Time Warner Cable to shift the remainder of its subscribers to cable service provided by Time Warner Cable.

Once its video subscribers have been given adequate opportunity to switch to another video provider, Nucentrix will begin the conversion of its systems to provide wireless broadband services in place of programmed video channels. Nucentrix currently expects to complete the

³ Nucentrix's wireless cable markets are listed in Attachment A.

transition of its cable subscribers to other video providers by the end of 2003.⁴ Although Nucentrix may continue to operate a small number of its wireless cable systems beyond 2003 to facilitate an orderly transition for its subscribers, the company is unable to identify those systems at this time.

Because the Commission does not require channels not used for video programming to carry EAS messages or alerts,⁵ Nucentrix would have no use for EAS equipment once it ceases to provide video programming. Thus, based on its imminent conversion to broadband wireless Internet and other data and voice services, Nucentrix seeks a waiver of the EAS requirements for each of those systems that will be shut down during the transition. As noted above, Nucentrix expects to cease operation in most of its wireless cable systems over the course of the next year. To the extent Nucentrix continues the operation of any of its wireless cable systems beyond any applicable waiver period, it would take the necessary steps to install EAS equipment on those systems; however, Nucentrix requests a 36-month temporary waiver of the EAS requirements for those wireless cable systems on which the company continues to provide any video programming.

II. Financial Status of Nucentrix and the Cost of EAS Compliance.

Nucentrix operates its wireless cable systems at a loss. Attached to this Petition are the following financial statements of Nucentrix: (i) unaudited balance sheet, income statement and statement of cash flows included in Nucentrix's quarterly report on Form 10-Q filed with the Securities and Exchange Commission ("SEC") for the second quarter of 2002; (ii) audited

⁴ During the conversion to broadband services, Nucentrix plans to rebroadcast the signal of local broadcast networks on its licensed and leased spectrum, but it will not have a paying subscriber base.

⁵ Amendment of Part 73, Subpart G, of the Commission's Rules Regarding the Emergency Broadcast System, *Second Report and Order*, 12 FCC Rcd 11503, 15523 (1997).

balance sheet, income statement and statement of cash flows included in Nucentrix's annual report on Form 10-K filed with the SEC for 2001; and (iii) audited balance sheet, income statement and statement of cash flows included in Nucentrix's annual report on Form 10-K filed with the SEC for 2000.⁶ A review of these financial statements illustrates the company's financial condition. Nucentrix has incurred operating losses since its inception. Its operating loss for the first six months of 2002 was over \$15 million. As reported in its Form 10-Q for the second quarter of 2002, the company expects that current cash on hand and cash generated from operations will fund operations only through the second quarter of 2003, and the company plans to seek additional capital before the end of 2002. However, in a time of restricted access to capital markets, the company can provide no assurance that such capital will be available in a timely manner or on acceptable terms. Accordingly, the company cannot afford the additional expense of purchasing and installing EAS equipment that will be used only for a few months prior to the termination of video services.

Due to its financial condition and the small size of its systems' subscriber base, it is not economically feasible for Nucentrix to purchase and install the necessary EAS equipment for the limited time it plans to continue operation of its video programming service. Nucentrix operates small wireless cable systems in medium and small markets. The number of subscribers in each of its markets ranges from a low of 53 subscribers in Beloit, KS to a high of 3,997 subscribers in Sherman-Denison, TX.⁷ The average system subscriber base is approximately 975. In addition, based on price quotes provided by EAS equipment manufacturers, the cost of installing EAS

⁶ See Attachment B.

⁷ Attached to this Petition is a list the markets served by Nucentrix and the number of subscribers in each market. See Attachment A.

systems in Nucentrix's markets is prohibitively high. Nucentrix estimates that it would cost over \$250,000 to bring all of its existing cable systems into compliance with the EAS requirements.

III. Likelihood of Hazardous Risks and Alternative Sources of EAS Information.

Nucentrix's cable systems are located in medium and small markets across Texas, Oklahoma and the Midwest, where the most likely hazards are weather emergencies, such as tornadoes, hurricanes, and flooding. Tornadoes pose the most serious and common threat to many of the communities served by Nucentrix because they are located in "Tornado Alley." Because of the severity and frequency of these weather emergencies, however, numerous alternative sources of emergency alert information exist in these communities.

Although Nucentrix's cable programming selections vary by the number of available channels in the cable system, all of its systems rebroadcast the programming of the local affiliates of the major broadcast networks, which carry news and information on text crawlers and interrupt programming in the event of an emergency. In addition, almost all of the Nucentrix systems also provide at least one 24-hour news network such as CNN, which provides breaking national news at all times. In addition, many of its systems carry The Weather Channel, which provides information on national and local weather events. Thus, during the period that Nucentrix continues to provide video programming, its subscribers will have access to multiple alternative sources of emergency information through their Nucentrix service.

The company believes that there is a competing cable service provider in each one of the company's fifty-five markets, although it is not likely that 100% of all households in each of these markets is passed by these competitors. Many of Nucentrix's markets are served by major MSOs such as AT&T Broadband, Time Warner Cable, Cox Communications, and CableOne. DBS programming, which includes news and other content that carries emergency information, is also available in Nucentrix's coverage areas. In addition to subscription services, subscribers

have access to EAS information through over-the-air reception of broadcast television and radio stations in their communities. Furthermore, civil defense siren systems provide notice of tornadoes and serious weather systems in many of the communities served by Nucentrix. Thus, Nucentrix subscribers have access to numerous alternative sources of emergency information.

V. Conclusion.

For the reasons explained above, Nucentrix respectfully requests waiver of the EAS requirements in section 11.11(a) for all of its wireless cable systems. Alternatively, Nucentrix requests a 36-month extension of time to comply with the requirements, during which time Nucentrix expects to have completed its conversion of its wireless cable subscribers and ceased its video operations.

J. Curtis Henderson
